

## HOW TO MAKE MONEY WITH MUTUAL FUNDS

One of the easiest ways to diversify your portfolio is to invest in a mutual fund. A mutual fund is like a basket in which lots of investors place their money and then that single large account is managed by a team of professionals. There are mutual funds that specialize in stocks, bonds, real estate, commodities... nearly any sector you wish to invest in has a mutual fund.

The two main advantages of a mutual fund over buying individual positions is that you can diversify your holdings (diversification is a traditional tactic to spread out risk), and you give the reins of portfolio management to a well-trained and experienced company.

- \* Simplicity
- \* Variety
- \* Diversification
- \* Economies of scale
- \* Easy to buy in small amounts
- \* Liquidity
- \* Professional management

Mutual funds are sold by prospectus, which includes information about risks and fees, so be sure to read it before you invest.
