

Protect Your Investments from Hackers with These 10 Easy Steps

1. Don't have the same password everywhere.
 2. Password protect your devices.
 3. Consolidate your assets so you don't have exposure with too many different accounts.
 4. Don't allow for online trading if you don't need it. Same goes for online money transfers. At least make sure you get an email when it happens.
 5. Watch your statements at least monthly.
 6. Sign up with a credit monitoring service company.
 7. Update your operating system automatically, or at least frequently.
 8. Don't use unsecured Wi-Fi networks.
 9. Use protection software and beware of phishing campaigns.
 10. Physically destroy hardware that has personal information on it.
